## Professional Summary

Full-stack Software Engineer with 4 years of experience at BlastAsia Inc. building enterprise web applications with Angular, TypeScript, C#, ASP.NET Web API, and Microsoft SQL Server. Experienced in API design, front-end to back-end integration, Azure cloud services, and Azure Blob Storage. Performs code reviews, led a small freelance team on a Laravel project, and upgraded a production app from Angular 8 to Angular 14. Uses AI-assisted development tools (Claude) to speed up delivery.

## Technical Skills

- **Languages:** TypeScript, JavaScript, C#, PHP, SQL, HTML5, CSS3, SCSS
- **Frameworks:** Angular (8 to 14+), ASP.NET Web API, .NET, Laravel
- **Databases:** Microsoft SQL Server, MySQL (phpMyAdmin)
- **Cloud:** Microsoft Azure, Azure Blob Storage
- **Tools:** Azure DevOps, Git, GitHub, GitHub Desktop, SourceTree, Figma, Claude (AI-assisted development)
- **Practices:** Full-stack development, RESTful API design and integration, entity/data modeling, code review, responsive web design, UI/UX, framework migration, bug fixing, task estimation, version control

## Work Experience

### Software Engineer I

BlastAsia Inc. | Dec 2023 – Present

**winCredit**

- A loan application and management system that lets members apply for loans online and helps lenders process them from application to approval and repayment. The platform handles membership records, loan applications, transactions, and reporting through an admin module where staff can review, approve, and track loans.
- Angular V14, TypeScript, ASP.NET Web API, C#, MSSQL, Azure Blob Storage, Azure OCR

**mWell**

- A digital health and wellness platform that helps users manage their health in one place. It covers user onboarding and profile setup, personal health records, a health diary and symptom tracker, and medication and treatment reminders. Users can also access healthcare services, read health education materials in a resource center, and connect with others through a peer support forum.
- Angular V15, TypeScript, ASP.NET Web API, C#, MSSQL

**NRHI**

- The system keeps patient information organized and accessible, which supports consistent, timely treatment for people who need dialysis on a regular schedule.
- Angular V15, TypeScript, ASP.NET Web API, C#, MSSQL

**CG (City Garden)**

- An OJT slot planning and trainee management system for hotel properties. It lets each property plan and monitor trainee capacity per department and shift (morning, afternoon, and night) across a weekly calendar view, so staff can see at a glance how many OJT slots are filled or available on any given day.
- Angular V15, TypeScript, ASP.NET Web API, C#, MSSQL

**Interport**

- A port and shipping logistics management system for assigning vessels to cargo and shipments and routing them to their destination countries. It helps operations teams track which items go on which vessel, manage shipment schedules, and keep cargo movement organized from port to port.
- Angular V15, TypeScript, ASP.NET Web API, C#, MSSQL

**BPS**

- An online board exam preparation platform that helps examinees review for licensure exams through practice tests, question banks, and progress tracking.
- Angular V15, TypeScript, ASP.NET Web API, C#, Azure Blob Storage, MSSQL

**Tempest**

- Upgraded the application framework from Angular 8 to Angular 14.
- Enhanced front-end features and provided application support and bug fixing.

### Associate Software Engineer

**SteerHB**

- A web-based bidding platform where users can post projects or items, submit bids, and manage the bidding process from start to award.
- Angular V14, TypeScript, ASP.NET Web API, C#, Azure Blob Storage, MSSQL

### Software Engineer Trainee

**Xamun**

- Integrated back-end APIs with the front end and contributed to front-end development.
- BlastAsia's AI-powered software development platform, designed to help businesses build custom applications faster.
- Provided support and bug fixing using GitHub and SourceTree.

### Freelance Full-Stack Developer

Syjueco Aesthetic

- Led the development team and managed the codebase using GitHub Desktop.
- Built full-stack features with Laravel, PHP, HTML, CSS, JavaScript, and MySQL (phpMyAdmin).
- Created a front-end coding standards guide for the team.
- Reviewed code before approving pull requests and estimated development tasks.
- Fixed UI responsiveness issues across devices.

## Education

**Bachelor of Science in Information Technology**

Our Lady of Fatima University – Valenzuela | Graduated Jun 2022

## Awards and Honors

- Top 12 Finalist – AppBuildersPH Hackathon 2026 (Alala, an offline mobile app for dementia), Oct 9–10, 2026
- Best Application – Capstone Exhibit, 1st Semester, S.Y. 2021–2022
- 3rd Place, Capstone Category – Capstone Exhibit, 1st Semester, S.Y. 2021–2022
- Dean's Lister – 1st and 2nd Semester, S.Y. 2020–2021; 2nd Semester, S.Y. 2019–2020
